### 1er Desafío

#### Indira Meza

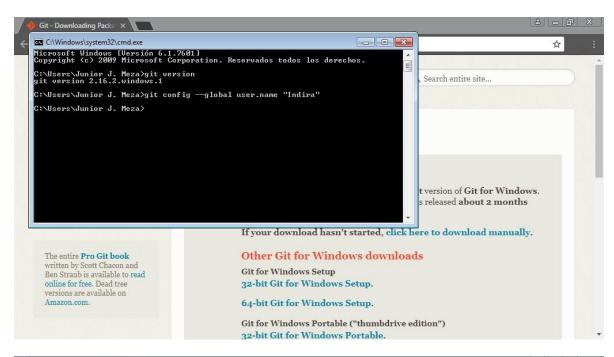

## 1.- Realizar la descarga e instalación de Git

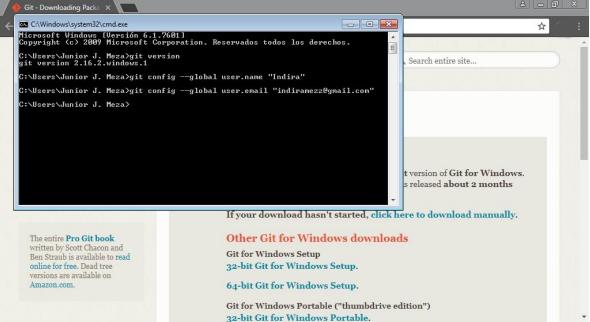

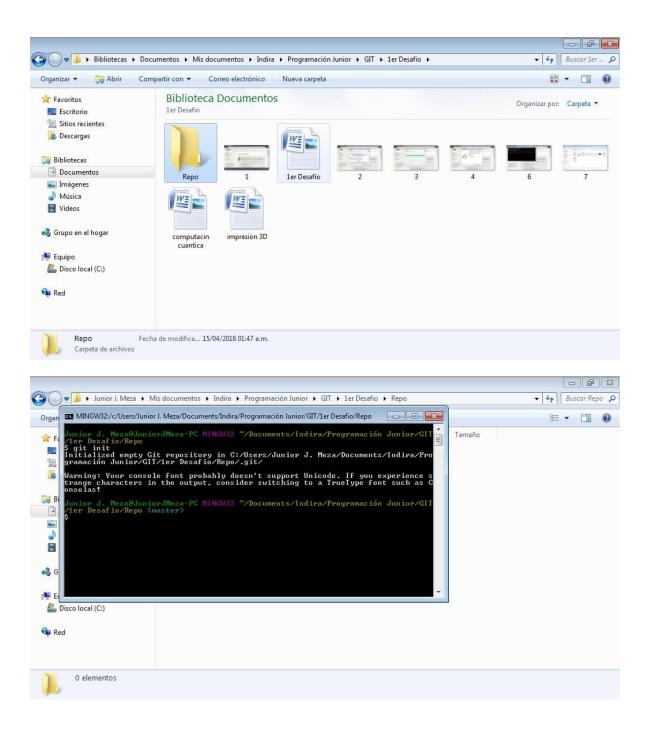

# 2.- Realizar primera configuración (Nombre de usuario y email)

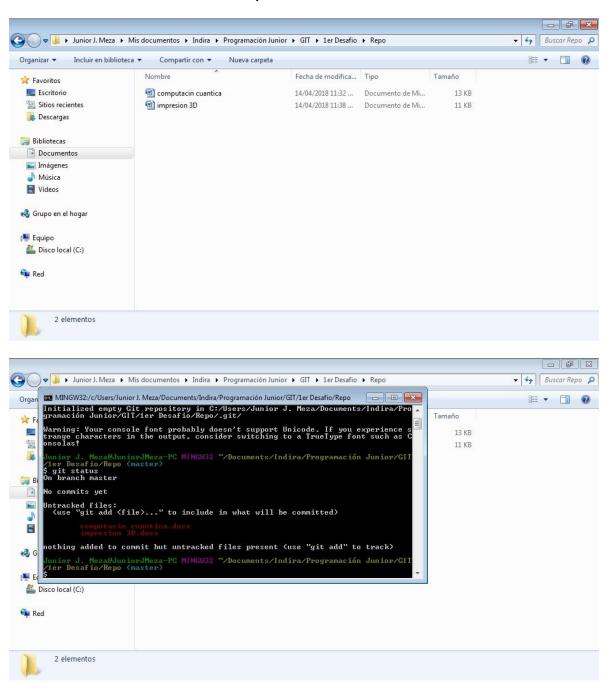

## 3.- Crear una carpeta donde inicie un repositorio de git

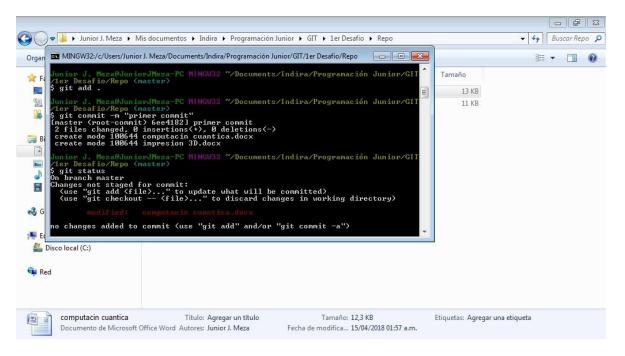

## 4.- Agregar archivos o algún proyecto previamente realizado y verificar los estados del repositorio

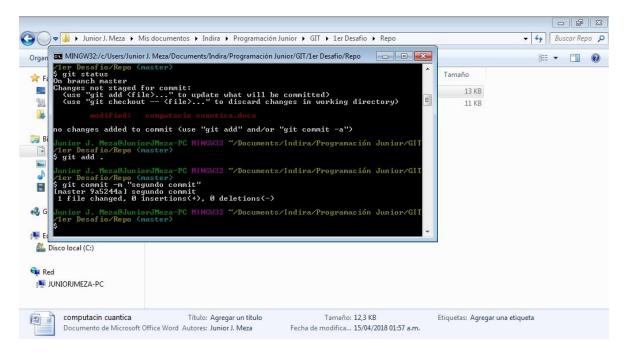

# 5.- Realizar 5 commits de cambios realizados sobre los archivos. Mostrar los commits con el comando log

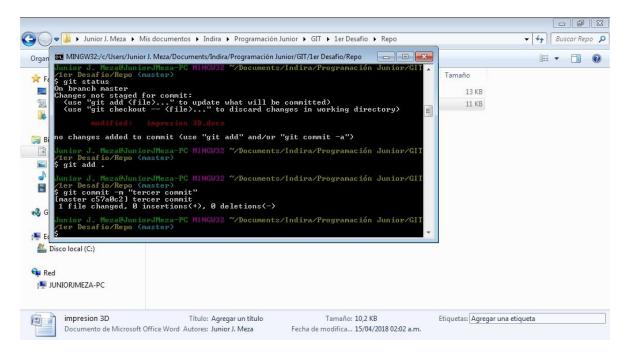

#### Primer commit

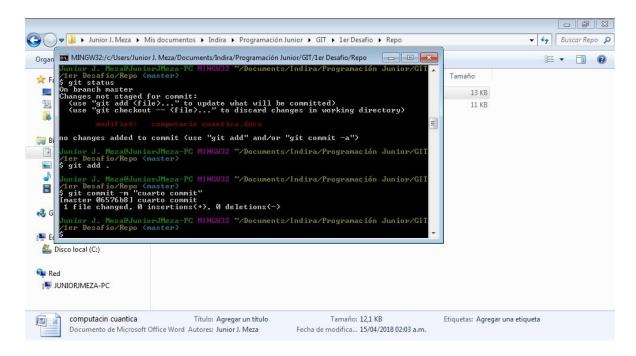

### Segundo commit

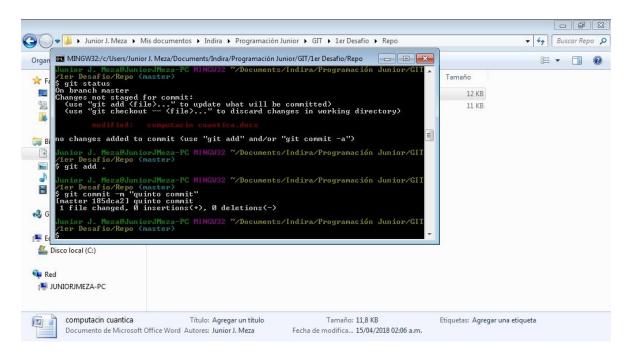

Tercer commit

#### Cuarto commit

### Quinto commit

## Muestra de los commit con git log
